

RCO-600 Open Jaw Ratcheting Cable Cutter is engineered for fast and efficient cutting of large-diameter copper and aluminum cables. Designed with a front-loading open jaw, it provides easy access to cables in tight or confined. The ratcheting mechanism delivers maximum leverage with minimal hand force for smooth and controlled operation. This cable cutter features the following:

- Cuts copper cables up to 600 MCM, aluminum cables up to 750 MCM, and multiple conductor communication cables up to 28mm.
- Front-loading open jaw design allows quick side-entry for cutting in tight or crowded areas.
- High-leverage ratcheting mechanism reduces effort and increases cutting efficiency.
- Precision-hardened steel blades ensure long-lasting edge retention and performance.
- Ergonomic cushioned handles offer improved comfort and grip during extended use.
- Quick release mechanism simplifies blade back-out, locking latch keeps the tool closed for secure transport and easy storage.
- Not intended for use on ACSR, steel cables, or live wires.

SPECIFICATIONS	
UNIT OF MEASUREMENT	Metric & Imperial
MAX. CABLE DIAMETER	Copper: 600 MCM (304 mm ²), Aluminum: 750 MCM (380 mm ²), Communication Cables: 28mm
MAX. JAW OPENING	32mm
FOR USE WITH	Copper, Aluminum, Multiple Conductor Communication Cables
MATERIAL	Carbon Steel
DIMENSIONS	11.5" x 3.5" x 1.28" (29.21 cm x 8.89 cm x 3.24 cm)
WEIGHT	2.2 lb (997.9 g)
UPC #	810132439193
