

Designed for fast and efficient dismantling of buffer tubes, these cable shaving pliers are the perfect tool for performing midspan or endspan shaves for buffer tubes from 1.1 - 2.3 mm in diameter.

These cable shaving pliers also features the following:

- Ultra-sharp blade shaves open Corning, Hexatronic, Air Blown, and other buffer tubes to access the fibers inside with ease
- Blades are fixed to prevent damage to internal fibers, with no adjustments needed
- Blade cartridges hold the cable in place for accurate and precise microduct shaving
- Spring-loaded ergonomic handles provide a comfortable grip and reduce hand fatigue
- Set screws on blade block makes it quick and easy to replace the blade
- Replacement Blades **CSHP-1RB** and Replacement Cartridges **CSHP-11C-23C** sold separately

Kit includes: Cable Shaving Pliers, 1.1 - 2.3 mm Blade Cartridges, and (2) Replacement Blades in a Hard Carrying Case
