

The CSP-RPXMB is a precision replacement block designed specifically for the messenger/toner side of the CSP-RPXSM double-head RPX® cable slitting tool. It allows technicians to isolate the messenger/strength member and toneable wire bundle from the main cable and slit their jackets safely and efficiently.

- Simultaneously isolates the messenger/strength member and toneable wire bundle and slits jacket.
- Guide blocks holds the cable in place for accurate and precise cable slitting.
- Compatible with CSP-RPXSM frame.
- Includes set screws for the blade, allowing fast swapping without specialized tools.
